**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-42, 47 and 48, drawn to a method, system, and/or program instructions for monitoring a processing system classified in class 702, subclass 194.
  - II. Claims 43-46, 49 and 50, drawn to a method and/or program instructions for classifying a process fault, classified in class 702, subclass 185.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as monitoring a processing system to determine process efficiency or presentation of process operation to a user without any classification of faults. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Edwin Garlepp on March 04, 2005, to request

an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
